Like the book 'Man After Man', the book starts off with science chapters that in this case do their best to explain evolution, the food chain and the history of life on Earth. Unlike 'Man After Man' it is not set up like a story, but a true non-fiction text book, like one you might have in a class room or while out camping.

Amazon.com: After Man: A Zoology of the Future ...

Science explaining the real. After Man: A Zoology of the Future is a work of TRUE science fiction. Normally when fiction is meant to be "educational" it is often a lazy attempt to explain facts. But fiction is better at capturing the imagination. Of showing potential and patterns rather than individual statements. After Man understands this.

After Man: A Zoology of the Future by Dougal Dixon

After Man is an extrapolative tour de force." --Isaac Asimov's Science Fiction Magazine "Stunning in execution and implication, this will be a decided treat for futurist biology student or enthusiast, science fiction fan and general reader." --Booklist. About the Author.

Dougal Dixon - After Man- A Zoology Of The Future (pdf ...

Call a Smeerp a "Rabbit": Using taxonomic orders developed by pre-20th century humans to describe animals from 50 million years after man's extinction results in something like this. For example the wakka (ratite-like bipedal grazer), desert leaper (resembling a dromedary but with kangaroo-like hopping motion), and bardelot (polar bear analogue with sabretoothed females) are all classed as rodents even though they're very different from each other and don't always have what we identify as ...
