Intellectual Property Valuation and Royalty Determination

A variation of the investment rate-of-return analysis can also be used for royalty rate derivation. This alternate method makes use of a discounted cash flow analysis, which converts a stream of expected cash flow into a present value. The conversion is accomplished by using a discount rate, reflecting the risk of the expected cash flow.

Discounted Cash Flow Analysis and Royalty Rates

tion of a reasonable royalty rate is that the selected royalty rate represents a reasonable indication of the value for use of the patent or trademark (the "subject intellectual property"). The reasonable royalty can be calculated based on: 1. an established royalty for the subject intellectual property, 2.
