About | Dtec

VTEC (Variable Valve Timing & Lift Electronic Control) is a system developed by Honda to improve the volumetric efficiency of a four-stroke internal combustion engine, resulting in higher performance at high RPM, and lower fuel consumption at low RPM. The VTEC system uses two (or occasionally three) camshaft profiles and hydraulically selects between profiles.

VTEC - Wikipedia

Despite its modest capacity the twin-turbocharged 1.6-litre diesel engine performs very well, especially when combined with the desirable nine-speed automatic transmission. It is quite refined, only becomes vocal when revved hard, and the acceleration on offer is strong despite the impressive economy and emissions.
