A line segment that crosses the circle by passing through the center of the circle is called the diameter. The diameter twice the length of the radius. In the circle above AC is the diameter of the circle. A chord is a segment that also has endpoints on the circle, but the line does not need to cross through the center. On the circle below BC and AC are chords.

The thought was that it would "flop" so needed something at the back to support it into a circle shape. But now that it's backed (with a very thin batting) it's actually quite stiff and self supporting, so I haven't needed to insert wire, or perspex, or thin timber, or anything, to make it hold its shape.

Tie a double knot to one of the lines created in the warp section. I chose to tie a knot around the notch with two pieces of yarn so that it would immediately look like one line. Tie the knot close to the center of the loom. Take your yarn and go over and under each line of warp. After weaving one circle, it may not look like much, but keep going!

For example, <Line Stroke="Red" X2="400"/> defines a horizontal line that is 400 pixels long. The other X,Y properties are 0 by default, so in terms of points this XAML would draw a line from (0,0) to (400,0). You could then use a TranslateTransform to move the entire Line, if you wanted it to start at a point other than (0,0).

If you don't use bias binding, you will not be a happy camper. :) Personally, I think it's a more finished look for a quilt, especially with a sophisticated design like the one created with the wedges. And if you're unsure, just make a small half circle quilt sandwich from scraps and try to attach a piece of (bias) binding to it.

This spell is used to bind a Circle together. Incantation: Fire, earth, metal, air, water and blood, by these elements we bind the circle and follow in the steps of our ancestors, who pledged themselves to fight against the forces of darkness. When evil assails us, when fear weakens us, when descent threatens us.
