If you switch to Aux input, CD, satellite radio, etc..., the power antenna wire will stop receiving power and your amplifier will power down as a result. Understanding what a remote turn on wire does and installing it correctly will ensure there is no unwanted current draw on the vehicle's battery when the audio system should be off.

After tons of research on what others before me had done to fix their ailing CD player on the 3rd gen 4runner, I picked up a Scion T1807 head unit off of ebay for dirt cheap (—\$32 shipped). I don't have an ipod, but a SanDisk Sansa instead, so the ipod controllability through the HU wasn't an important factor in my choice of HU.

Now comes the cutting. The scion radio is about 1 full inch wider than the original. It also is able to project forward through the trim, so you want to move it forward about 3/8 inch. So, on the original radio, there were two mounts that attach to each side of the radio. These had the two 10mm bolts that you took out in the earlier step.

Just saw it in the 4.3 section but it is totally applicable to those of us with Scion units. I have the unit from a 2006 scion in my RAV. Scion Pioneer T1807. It is a great unit for those of us not wanting Ipods. This would seamlessly add blue tooth to it and even use the factory steering wheel buttons.
